# Klik Lighting Connection

Klik is the lighting connection system for all your lighting designs, benefiting from its modular and adaptable design. From concept to commissioning, Klik adapts to meet your requirements.

**:hager**

# **Klik is the lighting connection system for all your lighting designs.**

**Established in the UK in the 1980s with its innovative 4 Pin plug & socket, installers have come to know and love Klik for its speed & ease of installation.**

**Klik has continued to develop to meet the changing needs of modern lighting connection & control systems through the Klik 4 & Klik 7 Ranges.**

**But the ethos has stayed the same...**

**Just Klik and forget.**

# From Start to Finish.

With its pre-wired plugs, Klik saves time on site, eliminates the chance of poor connections and allows for the system to adapt as needs change.

Luminaires can be plugged-in in seconds, with absolute safety and without circuit isolation. The secure, simultaneous mechanical & electrical connection gives complete confidence.

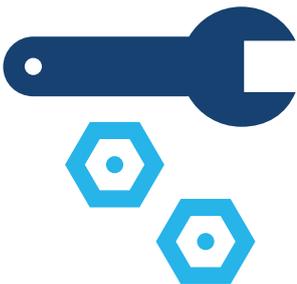

## 01 Design

Klik is able to exploit the benefits of pre-fabricated wiring systems through its modular and adaptable design. From concept to commissioning, Klik adapts to meet your requirements.

By being a pluggable system, the prospect of future refurbishments is also nothing to worry about, lights or groups of lights can be relocated quickly and easily.

## 02 Install

The Klik connector system brings plug-in convenience and versatility to lighting. Lights can be plugged-in, in seconds, with absolute safety, without circuit isolation.

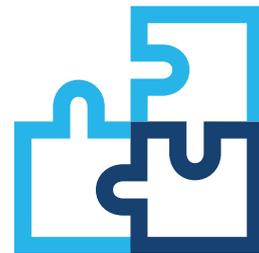

The unique design prevents any unwanted disconnections due to load on cables or vibrations.

## 03 Use

Klik is a truly fit and forget lighting connection system. With a range of settings for daylight linked dimming, occupancy sensing photocell control for standard luminaires and DALI control, after Klik is installed, you'll forget it's even there.

## 04 Adapt

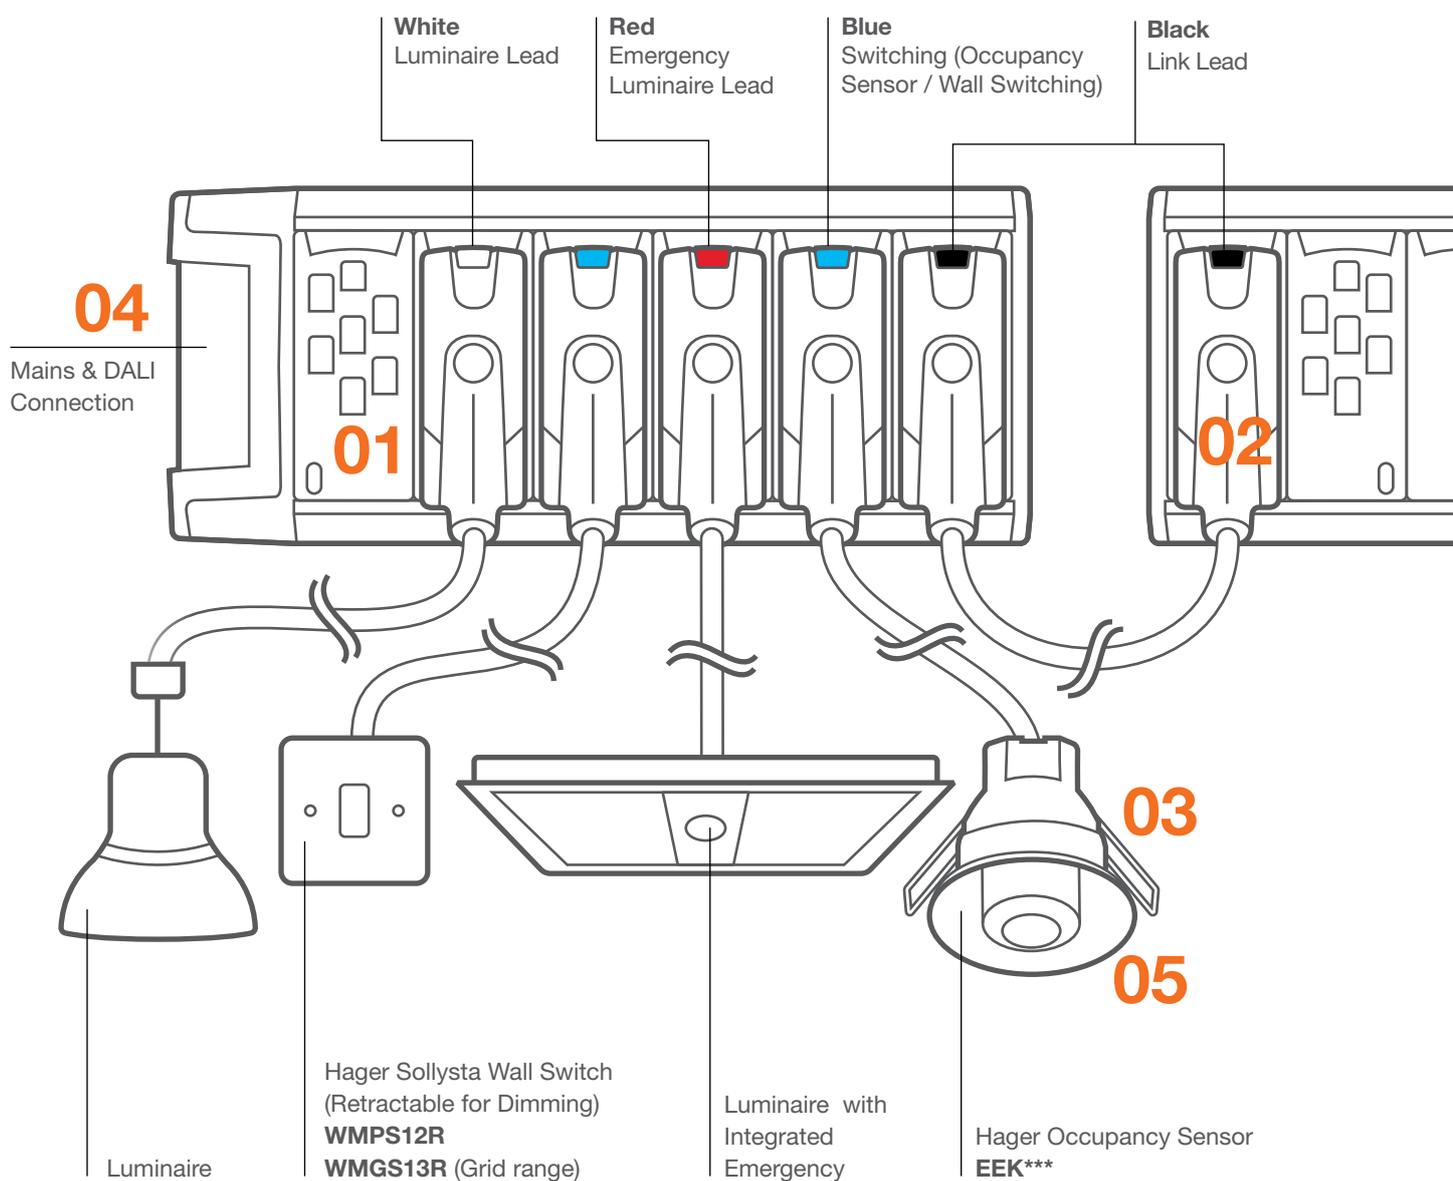

Part of the problem with traditional lighting systems comes when a building or office space needs to change. The inherent benefit of Klik is that adapting to a new layout is as easy as plugging in a plug.

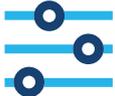

# What Klik can do for you

Over 75% of existing lighting installations are thought to be out of date and unable to meet current design standards.

With Klik 7, we provide a system which is energy efficient, meets current design standards and takes into account the usage and function of a space, responding to daylight levels as well as occupancy and footfall.

# Benefits - At a Glance

		Klik 3 / 4	Klik 7		
	<b>Connection</b>	Safe on-load connection / disconnection	✓	✓	
		Superior electromechanical connection	✓	✓	
		<b>Control</b>	Occupancy sensing for on / off control	✓	✓
			Occupancy sensing for daylight linked on / off control	✓	✓
Lux level 'trimming' during commissioning			✗	✓	
Automatic dimming (daylight linked)			✗	✓	
	<b>CIBSE</b>	Manual dimming (via wall switch)	✗	✓	
		DALI / DSI	✗	✓	
		<p>By following the information CIBSE provide, building operators, designers and employers are better able to demonstrate compliance with UK building regulations and a number of lighting related BS EN standards, by incorporating the following Klik features.</p>			
		Use Occupancy Sensors	✓	✓	
		Use Daylight Sensors	✓	✓	
		Have a Maintenance Plan	✓	✓	

## 01

### Safe on-load connection

Luminaires can be connected in seconds in absolute safety, without circuit isolation, as all live contacts are inaccessible and the earth connection is made before any other, facilitating a simplified maintenance plan.

## 02

### Electro Mechanical Connection

All Klik plugs feature a unique plug-in method which achieves a simultaneous mechanical and electrical connection.

## 03

### Occupancy Sensing

Our range of occupancy sensors can provide presence and absence control of lighting, providing energy savings by switching lights on or off depending on the usage of the room.

## 04

### DALI Control

DALI (digital addressable lighting interface) is a broadcast communication system that brings digital technology to lighting. Our 7 pin Klik products offer full compatibility with DALI control solutions.

## 05

### Trimming of lux level

DALI based occupancy sensors enable trimming of lux level at commissioning stage to ensure optimum final lighting levels, when used with compatible, dimmable luminaire.

## 06

### Daylight Link

Klik allows for automatic lighting control which can provide energy savings by not operating when sufficient light levels exist.

# A Fast, Adaptable & Secure Solution.

Providing an optimal lux level for the occupiers of a building is just one of the often overlooked functions of a quality lighting connection system.

Klik 7 provides an adaptable solution to any challenge faced in designing a modern, scalable lighting system, by ensuring the lux levels of dimmable luminaires can be adjusted during commissioning and, most importantly, after feedback from the occupiers.

# The Value of Control

A basic level of control can be achieved easily with the use of occupancy sensors, by 'trimming' the lux level of dimmable luminaires to the required level at commissioning stage, helping to avoid costly problems later.

As lighting technologies and their applications continue to evolve, so too must the lighting connection systems used. The Klik range, with its combination of occupancy sensors, motion detectors, ceiling roses and marshalling boxes, can facilitate the inclusion of more complex control options as required.

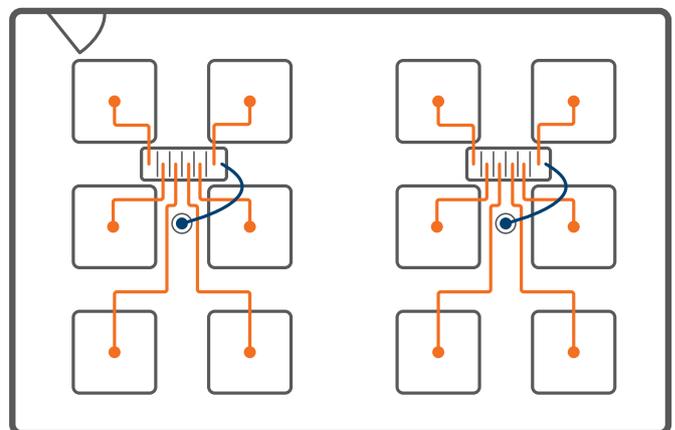

Klik 7 provides all the benefits of Klik 4, creating a truly scalable level of control when matched with our sensors or other higher level supervisory systems, with the advantages associated with a built in control pair.

## Application Examples

### Application 1 - Office with no natural light

<b>Sensor settings</b>	Presence
<b>Lux sensor used</b>	No
<b>Wall switching</b>	None - auto only

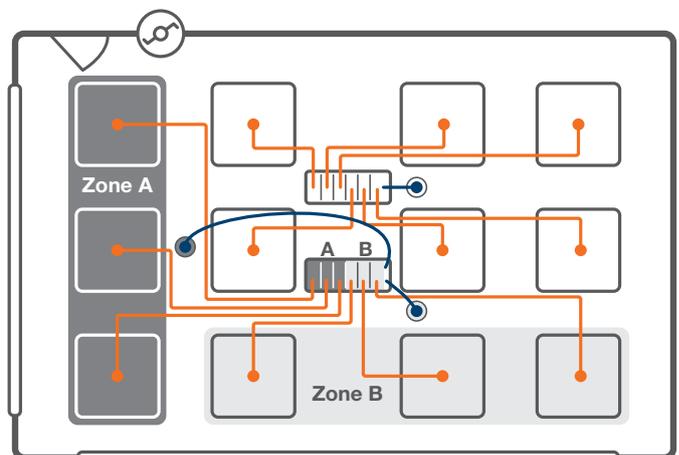

- Two KLMB/KLDS marshalling boxes
- No natural light
- Standard or digital luminaires
- Auto on when entering room
- 20 Minute time out when vacant

### Application 2 - Office with windows on two sides

<b>Sensor settings</b>	Presence
<b>Lux sensor used</b>	Yes
<b>Wall switching</b>	Optional

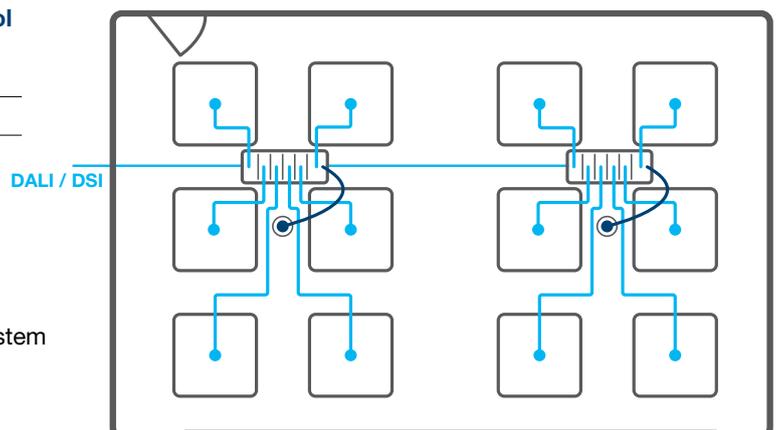

- One dual supply KLMB marshalling boxes & one standard KLMB box
- Auto on when entering room
- Natural light on two sides
- Digital luminaires adjacent to windows - standard or digital luminaires elsewhere
- 2 x digital sensors & 1 x standard sensor.
- 20 minute time out when vacant

### Application 3 - Klik connection with 3rd party control

<b>Sensor settings</b>	Presence
<b>Lux sensor used</b>	Optional
<b>Wall switching</b>	Optional

- Two KLMB marshalling boxes
- Natural light on one side
- Digital luminaires
- Auto on when entering room
- 3rd Party head-end lighting control/supervisory system

# Klik 7

Delivering all the time saving, flexibility and secure lighting connection benefits of Klik 4, Klik 7 offers the additional benefit of an embedded control pair for the dimming of luminaires, providing a scalable approach to lighting control.

Developed to specifically address the latest lighting technologies, Klik 7 has evolved as an essential element of controllable lighting solutions.

Essential 'trimming' of lux levels to optimise the light in a room can easily be implemented through the use of DALI enabled Occupancy Sensors, which can then be adjusted at the commissioning phase and if required, after occupier feedback.

Klik 7 facilitates a truly scalable approach to lighting control, without compromising speed, security or flexibility of installation.

From intelligent occupancy sensors to manage lux levels and common control requirements, to sophisticated 3rd party 'head end' control and supervisory solutions, Klik 7 facilitates all your lighting application requirements.

# Klik 4

Klik 4 is a modular plug-in marshalling solution for lighting systems that provides simultaneous mechanical and electrical connection in one click-in action. Designed for on-load connection & disconnection, Klik 4 allows individual light fittings to be removed or added without affecting other fittings on the circuit.

3 pin moulded plugs and leads distribute switch live, neutral and earth with 4 pin providing an additional connection, normally a permanent live for emergency lighting.

Pre-wired or self-wired plugs provide a highly adaptable solution for when systems need to be altered. Klik significantly cuts down on installation time by limiting the testing requirements at the commissioning stage.

# Klik 7 Case Study

**Project Name: Facebook Data Centre**

**Location: Clonee, Co. Meath, Ireland.**

**Products Used: Klik 7 with DALI sensors**

Klik 7 and DALI sensors were chosen to provide lighting connection and control, to be installed in a Facebook Data Centre in Clonee, Co. Meath, Ireland.

The 250 acre Clonee Data Centre is home to servers that hold data from Instagram, WhatsApp, Messenger, and Oculus. Introduced in 2015, construction began on the €200m facility in April 2016 and rapidly grew to be the largest construction project in Ireland at the time.

After 7.2 million hours completed on the construction site by nearly 1,550 workers at peak, the first two buildings called Clonee 1 and 2, are now up and running. Clonee 3 is on the path to completion and Facebook is hoping to have it finished next year, while a planning application for Clonee 4 and 5 has been lodged. With the employment of 1,000 – 1,500 people for continuous periods of time, projects of this nature are remarkably good for the local and regional economy.

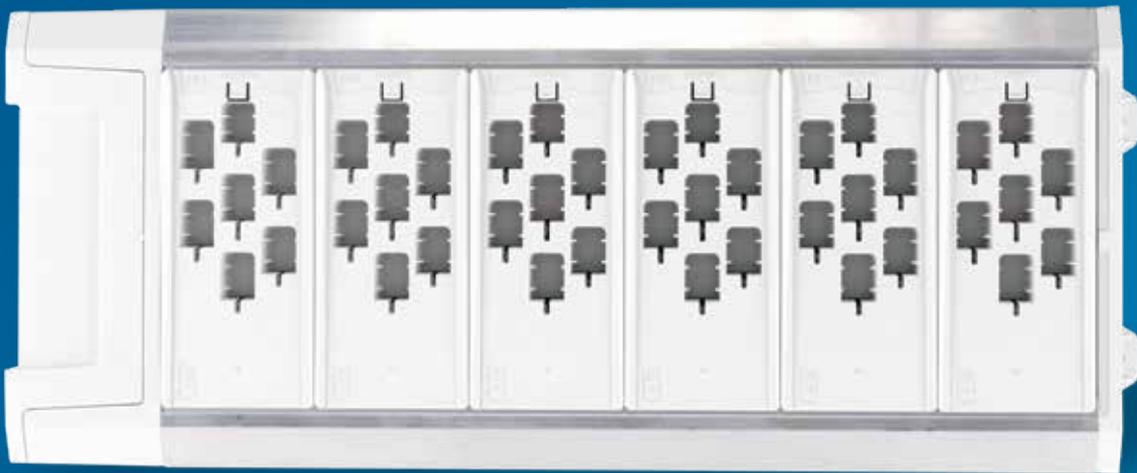

In an effort to stay energy efficient, Facebook designed an agreement with Brookfield renewable Partners, confirming that the site is 100% powered by wind energy and actively investing in constructing renewable generation capacity. At present, Facebook has stated it has added 2,500MW of renewable infrastructure that includes solar, wind and hydro globally in the last year alone and continues to increase as time goes on.

Mercury Engineering needed a lighting solution for wiring all the DALI fittings throughout the numerous data halls, and office spaces that occupy the building. Hager presented the Klik solution valued at €200k with the agreement to customise the length and part numbers to match the specifications of the project. After the decision was finalised, Mercury Engineering, distributor NEW and Hager worked closely together to come to an arrangement on time-scale, quantities and supply.

Hager's Klik range is a solution for any lighting design scenario. The Klik offer allows for automatic lighting control that provides energy savings by not operating when there are sufficient light levels present. With a range of settings for daylight linked dimming, occupancy sensing and DALI control, Klik was an ideal lighting solution for the Facebook Data Centre project.

# Lighting Connection

Lighting creates an impression. Klik, our lighting connection system provides the roots to a buildings lighting system, allowing it to adapt and grow with ease. Controls, including occupancy sensors, ensure that light is only available when needed and tailored to a users needs.

KLMB4W

### Marshalling Boxes - Wire In, Plug Out

#### Characteristics:

- The KLMB marshalling box allows the connection and control of multiple luminaires. The marshalling box utilises a robust extruded aluminium body.
- 7 Pole.
- 4, 6, 8, 10 & 12 outlets.
- 16A Rated BS 5733:2010 .
- Short circuit tested: 1500A conditional rating.

Description	Cat ref.

### Klik 7 Pre-wired Plugs with Sockets

#### Characteristics:

- Connections to the luminaire are made via a pre-wired plug and lead. All leads are low smoke zero halogen and are factory connected and tested.
- Standard, digital and emergency luminaires.
- Short circuit tested: 1500A conditional rating.
- Cable standard BS 7211.

Description	Cat ref.
<b>Pre-wired Plugs and Sockets for Standard Luminaires</b>

**Klik 7 Pre-wired Plugs**

**Characteristics:**

- Connections to the luminaire are made via a pre-wired plug and lead. All leads are low smoke zero halogen and are factory connected and tested.
- Standard, digital and emergency luminaires.
- Short circuit tested: 1500A conditional rating.
- Cable standard BS 7211.
- New for 2019 - references with 1m cable length will be provided as 1.5m.

We have recently improved our range of Klik 7 pre-wired leads. As part of this process, we have changed how our part references work. For example **KLB/3/0-75W** will now become **K7B3M075W**. For a full supersession chart, see page 30.

## Klik 7 Pre-wired Marshalling Box Link Leads

### Characteristics:

- The link leads are used to connect KLMB to KLMB. All leads are low smoke zero halogen and are factory connected and tested. Note: to ensure correct link lead selection see the connection key on page .
- 1.5mm<sup>2</sup> CSA.
- 3m, 5m & 10m lengths.
- Standard, Digital and Emergency Luminaires.
- 16A Rated.
- BS 5733:2010, BS EN 61535.
- Short circuit tested: 1500A conditional rating.
- Cable standard BS 6500 & BS 7211.

## Ceiling Roses

### Characteristics:

- 7 Pole conduit box / surface connector to allow the easy connection of digital lighting within traditional fixed wire installations. The connector is fitted directly to trunking or conduit allowing the luminaire to be connected / disconnected via the pluggable luminaire lead.
- 7 Pole.
- 16A Rated.
- Standards: BS 5733:2010.
- Short circuit tested: 1500A conditional rating.

## Wireable / Rewireable Plug

### Characteristics:

- 7 Terminal plug, enabling you to make leads on site to the configuration required.
- Complies with BS EN 61535-2009+A1-2013
- Enables you to add the plug after cable routing, for example when cables pass through walls.

Description	Cat ref.

EEK001

### Occupancy Sensors with Remote Programming & Control Options

#### Characteristics:

- **EEK520B** - Detector for control of digital (DSI/DALI) luminaires
- Direct control of a light load.
- Lux level and ON delay adjustable via potentiometers or **EEK001** remote control.
- DALI/DSI bus output accommodates up to 24 ballasts.
- 230V wall switch override.
- Presence or absence detection available.
- **EEK523P** - As **EEK520B** but pre-wired with 3m Lead
- **EEK525P** - As **EEK520B** but pre-wired with 5m Lead
- **EEK513P** - detector for control of standard luminaires (On/Off)
- Presence or Absence detection available.
- Programmable from **EEK001**
- 7m Range
- **EEK515P** - As **EEK513P** but pre-wired with 5m Lead
- **EEK001** - IR programming tool
- Installer remote control to commission settings.
- **EEK002** - IR remote control
- Customer remote control for override operation.
- Complies with BS EN 60669-1 & BS EN 60669-2-1.

Backbox Accessory for Surface BESA Detectors	<b>EEK005</b>

### Semi-Recessed Occupancy Sensor

**Characteristics:**

- The presence area is especially suitable in offices, where there may be notional corridors.
- **EE810** - 1 channel detector
- Provides direct control of a light load or can be used as a slave with **EE811** for enlargement of detection area.
- Lux level and ON delay (duration or pulse) defined via potentiometers.
- Test mode in order to set lux level and the detection pattern.
- **EE811** - 2 channel detector
- Lux level and ON delay adjustable via potentiometers.
- Input for slave (**EE810**) and/or remote push button.
- 230V wall switch override.
- Complies with BS EN 60669-1 & BS EN 60669-2-1.

### Hyper Frequency Detector

**Characteristics:**

- The detection range diameter is adjustable from one to eight metres. The hyper frequency sensor allows for detection of movement through partitions (drywall, wood, glass) independent of temperature detection.

**Features**

- 230V AC.
- IP54 rated.
- Detection area 360°.
- Complies with BS EN 60669-1, BS EN 60669-2-1.

EE883

Description	Cat ref.
360° Hyper Frequency Sensor	<b>EE883</b>
Protection Basket for Hyper Frequency Sensor	<b>EEK006</b>

### Corridor Motion Detector

**Characteristics:**

- Infra-red corridor motion detector for surface mounting.

**Features**

- 230V AC.
- IP54 rated.
- Detection zone of 4m x 20m.
- Overrun timer from 5 seconds to 15 minutes.
- Complies with BS EN 60669-1 & BS EN 60669-2-1.

PIR Corridor Motion Detector	<b>EE880</b>

# Klik

## Lighting Control Module

Klik LCM's (Lighting Control Module) enable the control of an area with up to 4 different control groups. Each group of outputs can control standard switched and/ or digital dimmable (DALI/ DSI) luminaires. The control module can be connected to up to 4 SELV occupancy sensors and up to 4 wall switch overrides (double retractive, centre off). Any switch or occupancy sensor can be assigned to any output.

The programming is carried out with iPad and communicates with the LCM via Bluetooth. We've also recently introduced an LCM which allows for local physical disconnection of bluetooth technology, for use in security sensitive applications.

### SELV Switching / Dimming

Each channel is capable of being switched via one of 4 or more switch inputs.

### Sensor with integral lux sensor (SELV)

This allows daylight dimming and switching utilising any natural light available

### Scene setting

4 lighting scenes are possible (plus global Up/ Down-On/Off) controlled via centre-off 2 pole retractive grid switch modules and 2 separate scene profiles are available.

### Partition switch

This allows total and separate control of a room with a partition and switch fitted.

### Corridor hold

Linking LCMs with RJ45 lead to hold designated corridor area

### Bluetooth local disconnection

LCM references with BT suffix: Bluetooth function can be locally disconnected for enhanced security applications.

### Integral emergency test timers

Emergency test carried out via an emergency test switch (can be set for up to 5 hours). Whilst on test the other luminaires will dim to a pre-set value.

### Presence & absence sensing

Each output channel can be set to Presence or Absence individually.

### Light level offset between channels

This function allows phasing channels to set as a percentage of the lead channel (e.g. 10%, 60%, 80%, 100%).

### Three level timeout

At timeout, lighting can turn Off or Dim down in three stages.

### Dimming - DSI, DALI (Broadcast)

Broadcast on the required channel to all connected luminaire

### Lighting Control Module with KlikLink

**Characteristics:**

- The KLCM allows connection and control of multiple luminaires with four separate channels.
- Switching, dimming (DSI & DALI), corridor hold, partition switching, daylight switching & dimming, scene settings, integral emergency test times, reset profiles, light level offset (channel to channel).
- Setting up of **KLCM** is accomplished via KlikLink app, available on iOS for iPad.
- For technical data, see page 36

### Lighting Control Module Occupancy Sensors

**Characteristics:**

- Klik SELV LCM occupancy sensors come complete with a 10m RJ11 lead and have integrated daylight sensing.
- Sensing options are selected via the KlikLink app (e.g. presence/absence).
- **KLCM-3OS** is designed for use as a corridor sensor.
- **KLCM-5OS** is designed for use as a whole room sensor.

### Marshalling Boxes

#### Characteristics:

- Klik marshalling boxes are used in conjunction with Klik 3 and 4 pin plugs to connect luminaires within an area. The Klik marshalling box can be separated into two independently switched circuits. These circuits can be controlled via wall switch or occupancy sensor.
- Complies with BS 5733:2010.
- Main terminal rating: 16 Amps.
- Socket outlet rating: 6 Amps.
- Separate terminals for flexible conductors, rating: 10 Amps.
- Short circuit tested 1500A conditional rating.
- Socket outlets accept either Klik lighting (3 pin) plugs, Klik auxiliary (4 pin) plugs.

### 3 Pin Plug-in Ceiling Rose & Cover

**Characteristics:**

- The 6A plug-in ceiling rose is used to offer a pluggable connection for luminaires. The luminaire can be connected and disconnected under load.
- Complies with BS 5733:2010.
- Sockets have 4 terminations: line, neutral, CPC and loop-in.
- Plugs have 3 terminations: line, neutral and CPC.
- Fixing: 50.8mm Standard Diagonal (BESA).

## Mounting Options for Trunking

Mounting Accessory can be clipped into the rear or top channel slot. It can be easily removed by inserting a screwdriver in the RELEASE slot.

## Fixed Wiring Connection

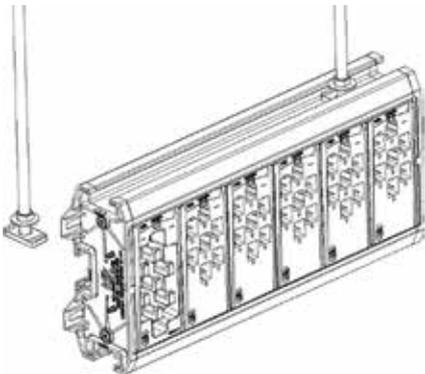

Klik 7 Pin LMB has seven screw terminals available to the installer and are arranged in the end cap as per diagram. DA+/DA- connections can be used for DALI/DSI control.

## Mounting Options for Drop Rod (Lighting Marshalling Box)

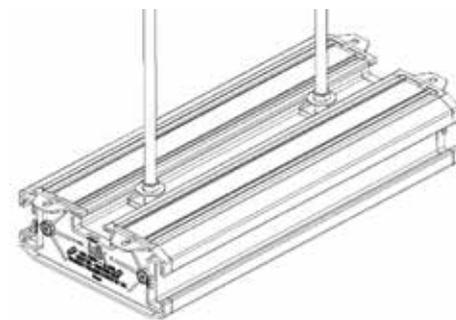

### Option 1.

Klik 7 Pin LMB features open ends to allow you to slide the box into position before tightening for easier installation, or push the box up on to the nut and rotate to locate and tighten to secure.

### Option 2.

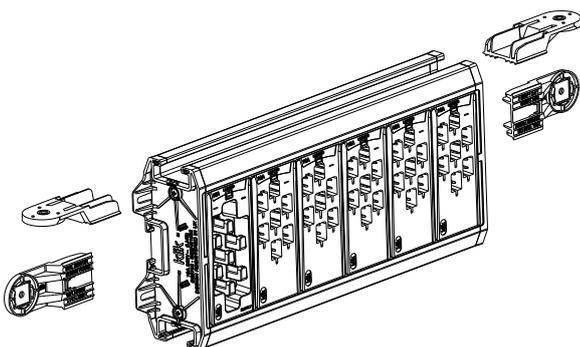

Single sided LMB can be mounted from the top as option 1 or from the rear as shown. Note: Double sided LMBs can only be mounted with option 1.

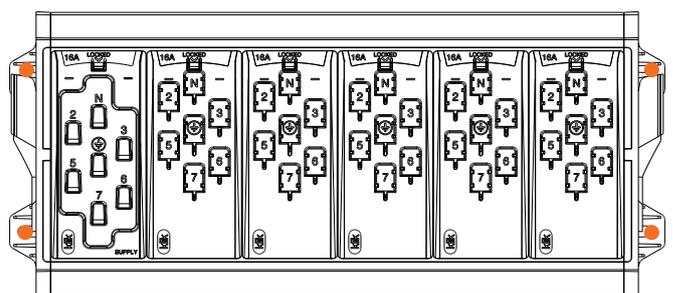

## Mounting Options for Wall & Ceiling

Klik 7 Pin LMB includes the Klik mounting accessory, this makes it much easier to mount LMB with Nail Guns or traditional fixings. 2 accessories are included with each LMB. Mounting Accessory can be clipped into the rear or top channel slot. It can be easily removed by inserting a screwdriver in the RELEASE slot.

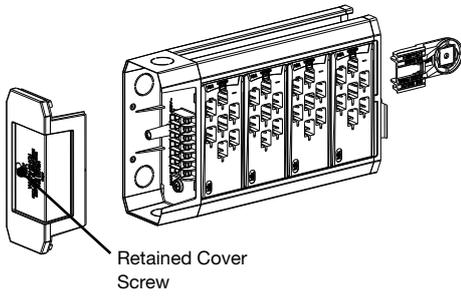

**Note: Double sided LMB can only be mounted on top channel slot.**

**KLPCR - Surface Mount Connector**

PCR can be mounted in two ways, firstly on to conduit box or secondly direct on to a surface.

Terminating cables.  
Terminal screws are retained in pockets.  
Max Terminal Capacity 2x4mm<sup>2</sup>  
Conductor strip length: 10mm.

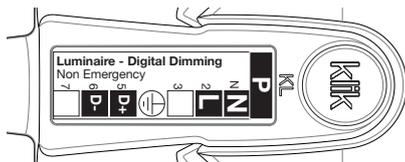

**K7PLUG Wireable Plug Configurations and Labels**

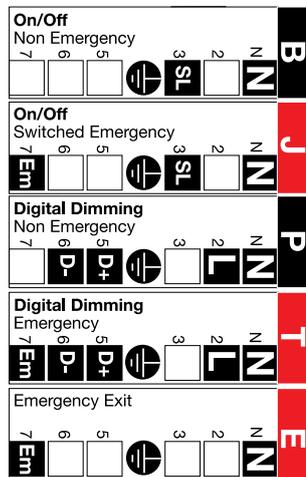

**Self Adhesive ID Labels:**

Apply label for the type of lead you are making.

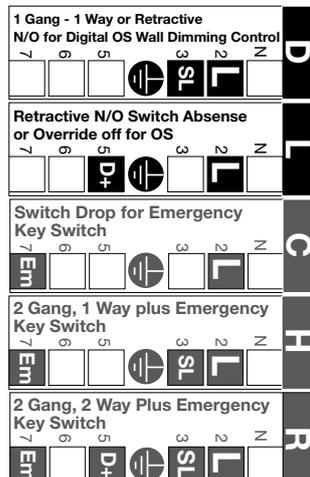

Lighting configurations for on / off and dimmable solutions.

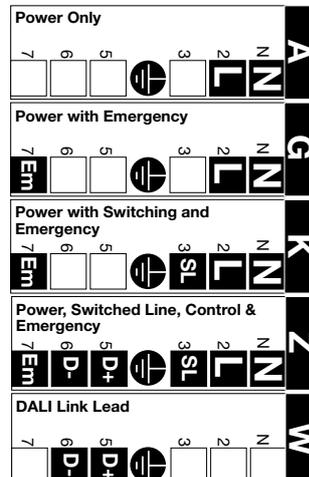

**Luminaire Connections**

**Switch Drops**

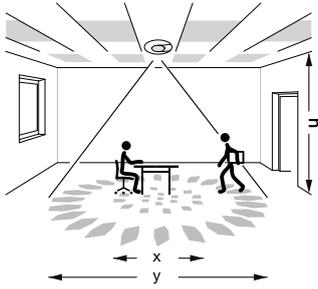

**Link Lead**

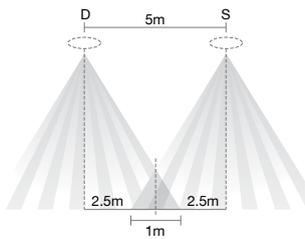

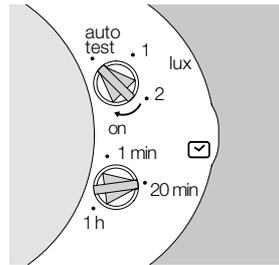

**EEK Sensors**

**Detection areas**

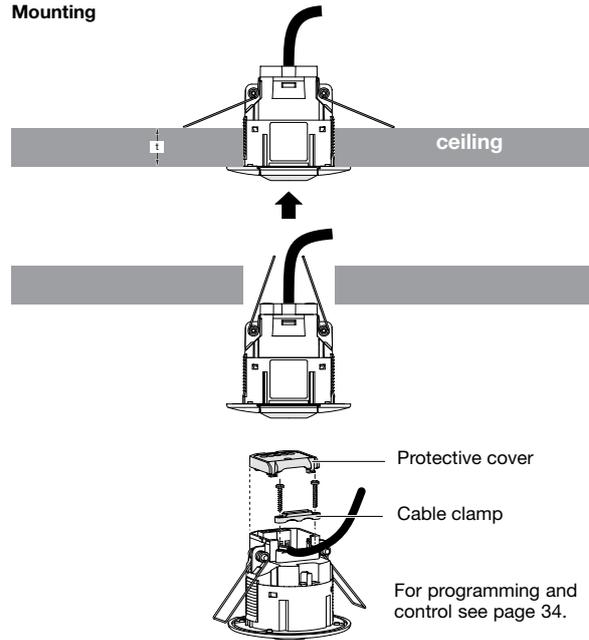

H	2.5m	3m	3.5m
X	5m	5m	5m
Y	7m	8m	9m

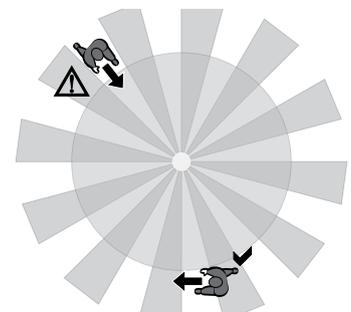

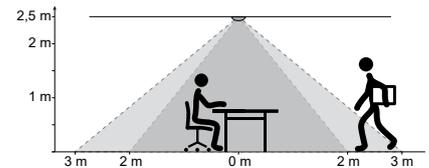

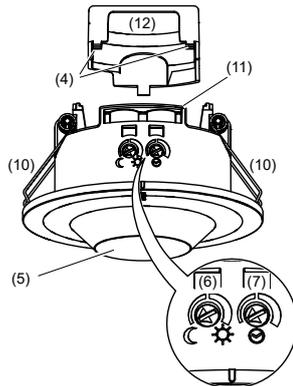

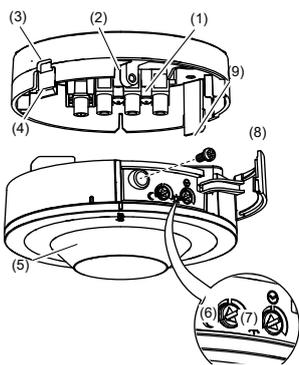

**Settings EEK513P/EEK515P  
EEK523P/EEK525P**

**Mounting**

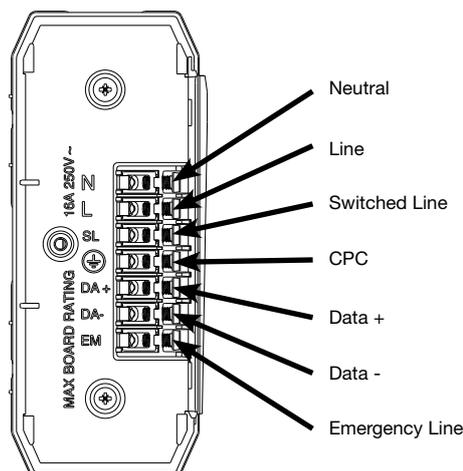

**EE804A / EE805A Sensors**

1. Connecting terminals
2. Mounting device locking screw
3. Release opening
4. Fastening grids
5. Detector lens
6. Response brightness potentiometer
7. Potentiometer delay time

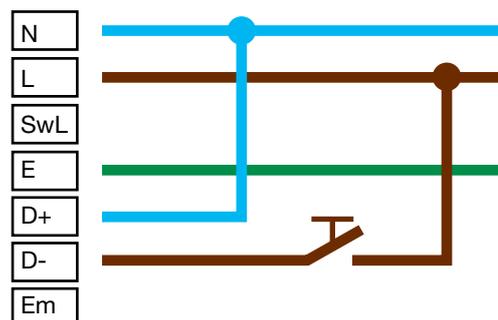

8. Cover for potentiometer
9. Locking screw
10. Fixing springs
11. Strain relief with mounting device for cable ties
12. Cover for connection compartment

**Manual dimming with retractable switch (no OS)**

**Hager Sollysta retractable wall switch references**

### Product Materials

Klik plugs and sockets feature solid brass terminals and phosphor bronze contacts for good conductivity. Moulded components are manufactured from high quality thermoplastics.

### Klik Terminal Capacities

	Number of Conductors				
	0.75mm <sup>2</sup>	1.0mm <sup>2</sup>	1.5mm <sup>2</sup>	2.5mm <sup>2</sup>	4.0mm <sup>2</sup>
Socket Outlets	-	5	4	3	2
Plugs P22, P64X, K7PLUG	1	1	1	-	-

The acknowledgment LED blinks during the sending of the IR message.

**Technical specification**  
Power supply: 1x 3V CR2032  
Shelf life of battery: 2½ years  
Protection index: IP 30

**Use**

The remote control allows the user to set or modify presence detector settings. When the potentiometer is on auto test it allows single and multiple settings. The SET key is used to send the IR messages to the occupancy sensors. Multiple settings can be stored in Memo 1 and Memo 2 and re-called to set several devices.

**Single setting**

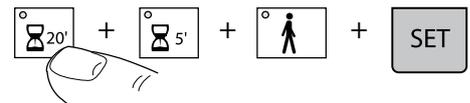

Example: reset

**Multiple settings**

Define the parameters to be changed and press SET to send.

Example: for 25 minutes and corridor use, press 20', 5' and corridor.

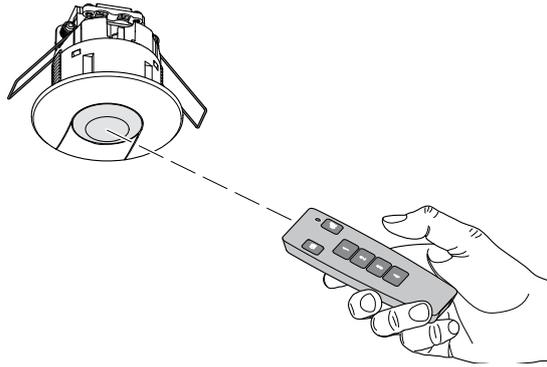

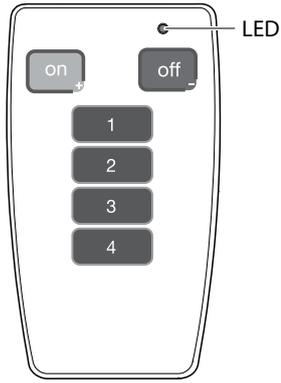

In the case of 2 opposite states the green LED denotes ON and red LED denotes OFF (except Presence / Absence).

When no function is selected all LED's are OFF.

**Settings available**

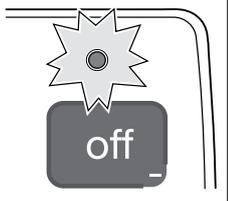

Key	Meaning	Indication	Function
	Presence	Green LED on	Presence on (automation mode)
	Absence	Red LED on	Absence on (semi automatic mode)
	Power Up	Green LED on	The light is automatically switched on for 30 seconds after power up
		Red LED on	During warm up phase, the light output is off
Reset	Reset	LED on	To return to factory settings (Lux = 400, time = 20 min, presence on, power up off and cell active)
Test	Test	LED on	To validate the detection area
	Time	LED on	To set the time It is possible to add times together e.g. press 2' and 5' for a time value of 7'
	Day level 1000 Lux	LED on	To set the value to 1000 Lux
	Learn	LED on	To learn the current Lux level
	Corridor 200 Lux	LED on	To set the value to 200 Lux
	Office 400 Lux	LED on	To set the value to 400 Lux
+	Lux +	LED on	To increase the Lux level (+100)
-	Lux -	LED on	To decrease the Lux level (-100)
	Active cell	Green LED on	The light is continuously measured
	Passive cell	RED LED on	The sensor will not switch the light off even if the ambient luminosity is sufficient
<b>Memo and set Key</b>	<b>Meaning</b>	<b>Indication</b>	<b>Function</b>
Memo 1	Press	LED is on until a setting is changed	To load/unload Memo 1
	Long press	LED is on for 5s, then will blink until released. After release, the LED goes off in case of setting change	To save the current setting as Memo 1
Memo 2	Press	LED is on until a setting is changed	To load/unload Memo 2
	Long press	LED is on for 5s, then will blink until released. After release, the LED goes off in case of setting change	To save the current setting as Memo 2
SET	Short press (<5s)	LED flashes	To send an IR message of the current setting
	Long press (>5s but <10s) only available if no setting active	LED blinks until release press	To toggle automatic mode on DALI/DSI

**Use**

The remote control allows the user to set or modify settings on the presence detectors **EEK513W** and **EEK510B**.

Each button corresponds to a command.

The acknowledgment LED blinks during the sending of the IR message.

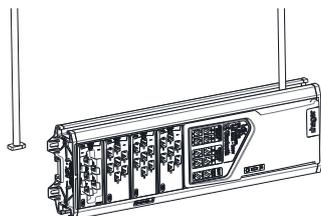

**Technical specification**

Power supply: 1x 3V CR2032  
Shelf life of battery: 3½ years  
Protection index: IP 30

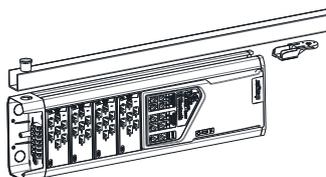

**Settings available**

### Mounting Methods

- Hanging from ceiling suspension system with Caddy Clips™
- Direct fixing to lighting trunking
- Direct fixing to ceiling or wall with No. 8 screws

Drop rods on sides

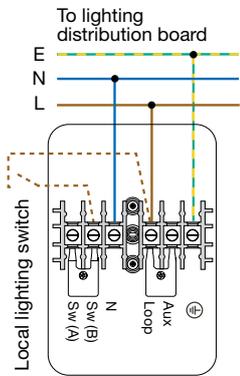

Screw to surface

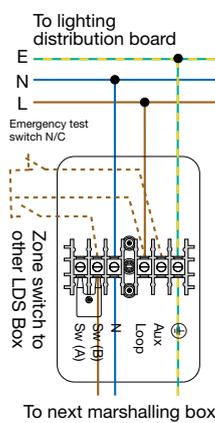

Drop rods on rear

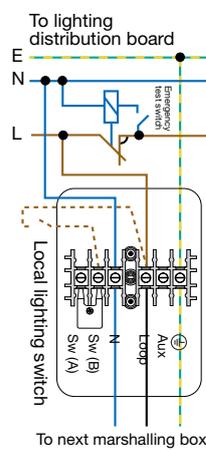

### Local Lighting Switch Control Permanent emergency feed

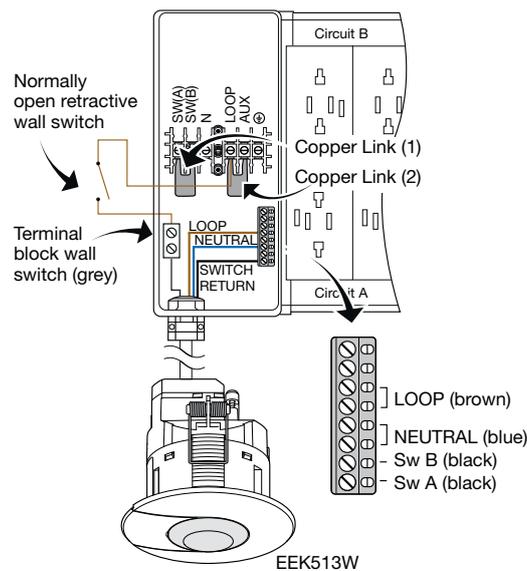

### Local Lighting Switch Control Centralised emergency test via key switch

### Zone Lighting Control Local emergency test control

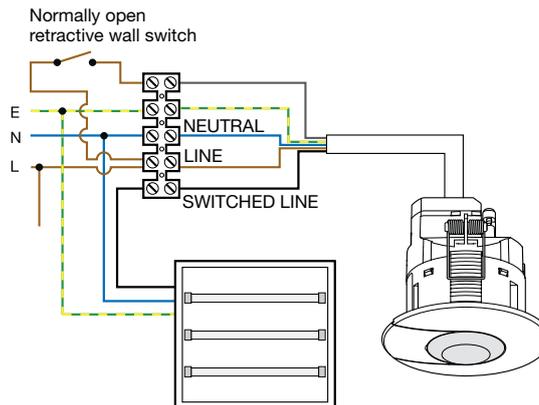

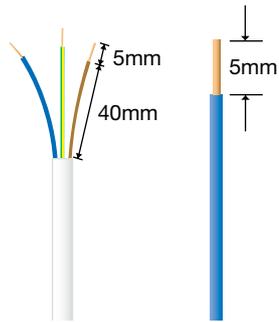

### All ways switched by a single Hager EEK513W occupancy sensor

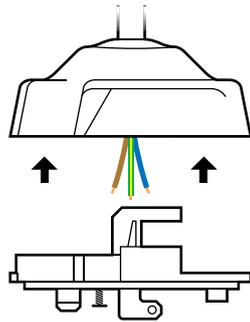

Switch wire to be connected as required.

### Connected directly to a single luminaire

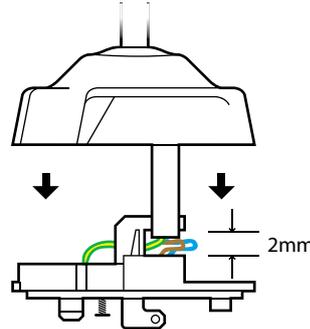

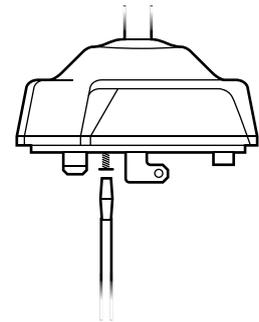

1. Strip cable as above -  
**Note:** Trim cable tails to double over for better terminal contact.

2. Remove plug cover.  
3. Pass cable through plug cover centre hole.

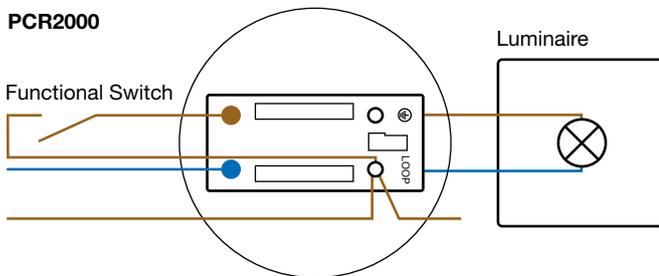

4. Terminate conductors into terminals.  
5. Push outer sheath of cable firmly into jaws of sheath grip, making sure that at least 2mm of sheath protrudes below the grip.

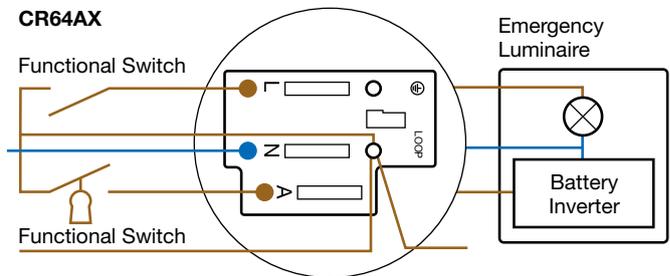

6. Refit cover.
