

The control of heating via tebis.KNX allows heating to be controlled in a efficient manor giving best comfort to the end user. This is achieved with the ability to zone heating, control individual rooms, utilise different temperature settings when the areas are vacated and even by control via tablet or smart phone.

Temperature Probe

Description

Temperature probe for TX320 tebis

Outside temperature sensor for TE3xx and Berker sensorik

Cat ref.

EK087

EK088

EK087

Actuators

Description

Valve actuator KNX with temperature control + 2 reserve inputs

Cat ref.

TX502

TX502
