

quadro4

The Quadro 4 boards and floor standing enclosures are designed for an easy assembling using 3 basic elements; back plate, sides and top and base panels, or top and plinth.

The vertical and horizontal combination of elements makes it possible to build "tailor made" enclosures for most requirements up to 630A. Thanks to slim packaging, storage and transport are optimised.

Locks

Description

Locking, univers, with 2keys, for IP43

Cat ref.

FZ597
